

Stellenbezeichnung: innogy's Group Graduate Programme (iGGP) Renewables

Give your #PIONIERGEIST and your career a decisive kick – apply now!

For our innogy location in **Essen** starting from **01.10.2018** we are looking for talented and determined graduates for our **innogy Group Graduate Program (iGGP) Renewables**.

Are you the fresh breeze on our way to an energy future that makes our lives easier, better and more sustainable?

Get to know the exciting world of renewable energies during your 18-month trainee program and be part of an international team that is shaping the future of renewable energies. You will get to know different departments and thus build up a broad network during your work.

Do you want to...?

- be part of exciting national or international projects in the planning, construction and commissioning of renewable energy facilities or also support our cross-sectional functions. You will have the opportunity to choose your focus area **Solar, Battery, Wind On-/Offshore** or **Commercial**.
- participate in the profitability analysis and investment planning for our own and also for customer projects
- support our daily business during your assignments and - depending on the field of application - also to supervise small projects independently
- get to know our project on the topic of Continuous Improvement "New Way of Working" and drive it forward with fresh ideas
- integrate your creativity and thus help to shape the energy world of tomorrow

That sounds good - and the following aspects describe you?

- you have successfully completed your studies (economics, engineering or similar)
- first relevant practical experience - especially in the field of renewable energies as well as first business knowledge gained through internships, your final thesis or in projects (preferably also abroad)
- renewable energies in a dynamic, growing environment are your passion
- dealing with common IT applications is no problem for you and you are interested in digitization
- through your strong analytical skills, you are able to turn data into valuable information to gain insights that you can profitably contribute to our projects
- you are curious and open to new things - you question the usual and are constantly looking for potential improvement and therefore develop your own ideas and concepts
- you use feedback as a learning opportunity and try to work on yourself
- you are a team player, communicative and self-confident - it is not difficult for you to meet new people and build your network
- you are also confident in English and can present presentations independently

And what are we bringing to the table?

Together with you, innogy would like to create the foundation for your career.

innogy SE is colorful, flexible, full of energy and creative ideas. We are located all across Europe and together with 40.000 colleagues in renewables, grid and retail we create a sustainable energy system for new generations to live in a world worth living in. We are offering existing and potential customers innovative and sustainable products and services which enable them to use energy more efficiently.

With our renewable energy sector, we are creating a sustainable energy system that will make the world liveable for future generations. For this, we need fresh wind under our sails and are looking forward to have you on board. We would like to offer you the chance to shape a main growth field of innogy in open-minded and dynamic teams. In addition to exciting assignments at our various locations in Germany, you also have the opportunity to work abroad.

After the successful completion of the program, we offer you even more, such as employee and health offers, child care and counselling services that make life easier. innogy offers a modern working environment, individual development opportunities and an open communication culture. These include, for example, home office, flextime and much more.

You can find additional benefits here.

What are you saying - do we have a deal?

Are you convinced we're a good match? Then register now and apply online by **3rd June 2018** for the innogy's Group Graduate Programme (iGGP) Renewables (ID 10505).
